Languages: French (Fluent) · English (Professional working — B2) · Arabic (Native)

PROFILE

Final-year Computer Engineering student at ENIAD Berkane, specializing in backend development with the .NET stack. Three completed internships and several projects focused on clean REST API design, Clean Architecture, Entity Framework Core, and modern DevOps practices (Docker, CI/CD). Currently looking for an internship or junior .NET developer role (remote or hybrid).

EDUCATION

National School of Artificial Intelligence & Digital Technology Berkane 2025 – Present
Engineering Degree — Computer Engineering, 4th year

Higher School of Technology of Salé 2022 – 2025
Bachelor's Degree web and mobile application engineering (2024–2025)

University Diploma of Technology's Degree Computer Engineering (2022–2024)

TECHNICAL SKILLS

.NET Stack: C#, ASP.NET Core, ASP.NET Core MVC, Entity Framework Core, LINQ, Minimal APIs, Razor

Backend & Architecture: Clean Architecture, Dependency Injection, Middleware, REST APIs, JWT, DTOs, AutoMapper, FluentValidation, Swagger/OpenAPI

Databases: SQL Server, PostgreSQL, MySQL, EF Core Migrations, MongoDB

Testing & DevOps: xUnit, Docker, GitHub Actions (CI/CD), Git, Postman

Other Frameworks: Spring Boot (Java), Laravel (PHP), Angular, Vue.js, Bootstrap

Methodologies: Agile / Scrum, Git Flow, SOLID, Code Review

PROFESSIONAL EXPERIENCE

Web Developer Intern Aug 2025 – Sep 2025
Mesfournisseurs.be — Belgium (Hybrid)

- Designed and delivered **RegistryApp**, a student registry web application built with **ASP.NET Core MVC**, Entity Framework Core, and SQL Server (authentication, full CRUD, server-side validation).
- Contributed to website maintenance and built responsive HTML newsletters.

Backend Developer Intern Apr 2024 – Jun 2024
National Office of Electricity and Drinking Water (ONEE) Rabat

- Built a **laboratory management web application** — sample tracking, test results, and reporting (Laravel, MySQL, Bootstrap). Gained strong experience with MVC patterns, ORM design, and authentication flows that translate directly to ASP.NET Core.

Web Developer Intern Jun 2023 – Jul 2023
Regional Inspectorate of Urbanism and Land Use Planning — Oriental

- Developed an **employee management application** with full CRUD, role-based access, validation, and reporting — replacing manual spreadsheet workflows for the HR department.

FEATURED PROJECTS

JobTracker API — ASP.NET Core · EF Core · PostgreSQL · Docker · Clean Architecture · JWT

- Production-grade REST API for tracking job applications through the hiring pipeline.
- 4-layer architecture (Domain, Application, Infrastructure, API) following Clean Architecture and SOLID principles.
- JWT authentication, DTOs with AutoMapper, FluentValidation, Swagger documentation, xUnit tests, Docker deployment with GitHub Actions CI/CD pipeline.

StudentRegistry — University Management — .NET 8 · ASP.NET Core MVC · EF Core · SQL Server · Identity

- ASP.NET Core MVC web application for managing university student records: full authentication, CRUD, search by name/email, server-side validation, and responsive Bootstrap UI.
- Data layer: Entity Framework Core with SQL Server and code-first migrations.

Tawjihi — SaaS d'orientation post-bac — .NET 8 · React · PostgreSQL · Gemini AI · Docker · CI/CD

- Full-stack SaaS platform (tawjihi.dev) helping Moroccan students choose their post-bac field: AI chatbot, 5-dimension recommendation engine, RIASEC quiz, filière comparator, CI/CD, deployed on Render + Vercel.
